

# **Aspects of organised extreme child abuse**

author Mr. Declan Howard - 20/1/2018

Below I list aspects of extreme organised child abuse that have been reported by survivors. Many more could be listed. This list is based upon my own experience, supplemented by testimony of others who have reported similar crimes.

This document was inspired by a discussion of the very fine work done in the extreme abuse survey of 2007. <https://extreme-abuse-survey.org/survey.php?en=b>

Here I attempt to include features that were not addressed at that time. I have not restricted myself to the territory defined by materialist scientific orthodoxy.

This type of crime has unexpected features. This is because it usually takes place in restricted access areas belonging to the military, religious institutions, cults, government and nobility. In such places the culture, the level of technology and even the people are different. There is a type of firewall in place which serves to keep the general public ignorant of the very existence of these matters. This crime although it includes child sexual abuse, is even more serious and devastating to the victim. It is usually referred to as trauma based mind-control, and is based upon the cult abuse practised by the ruling elite. The person is re-sculpted to be used as an asset.

This information is published here to guide investigators who are trying to profile and stop these crimes, and for psychotherapists so they can equip themselves to meet the needs of their clients. It is also here for the benefit of other survivors. You are not alone. Hopefully greater public knowledge will help survivors to not be mocked, dismissed and excluded. To any of the said criminals who read this, I suggest you start burning the paperwork and make plans for a more modest life.

These aspects are written in the format of a questionnaire for survivors. I have placed the section on crimes at the end on because it is more disturbing thus giving the option to stop reading. This is published as a resource. You are not required to post replies to the questions. Comments and the contact page are open. Thank you for your time, interest and solidarity.
